

# Riccardo Paltrinieri

## Software Engineer

### EXPERIENCE

- **Bankflip**

**Software Engineer**

Barcelona

January 2024 - Present

Helped creating new features and improving existing ones using Typescript and MongoDB on the backend, React on the frontend and python for the data extraction and data parsing services.

- **bunq**

**Backend Developer**

Amsterdam

January 2021 - December 2023 - 3 years

\_ Played a key role in the entire product lifecycle collaborating closely with cross-functional teams through a tech stack that included PHP, SQL, Redis, AWS and Sentry

\_ Took ownership of critical issues and implemented impactful solutions through personal research of the product pain points or frequent on-call duty.

\_ Mentored and helped growing new entries in the team.

### PROJECTS

- **Integrated multiple APIs** for identity verification providers into a single domain enabling failover capabilities, improving scalability and usability, and leading to improved onboarding and internal processes.
- **Automated various KYC and KYB processes**, such as information and document requests and user offboarding, accelerating business growth, enhanced operational efficiency, and increased customer satisfaction.
- Contributed to the development and implementation of several other features like:
  - New budget management
  - New subscription with interest rate
  - New minors account
  - Billing and invoicing optimization

### EDUCATION

**Computer Engineering**

Politecnico di Milano

Bachelor 2017 - 2020

### INDUSTRY KNOWLEDGE

Backend Development

Web Development

Server Management

Databases

Query Languages

Version Control Systems

API Development and Integration

Testing and Debugging

Agile Methodologies

Security Best Practices

OKRs

### TOOLS

Java, PHP, AWS, Typescript,

ElasticSearch, Git, Linux,

Docker, React

### OTHER SKILLS

Kotlin, HTML, CSS, Python,

Go
